The 7th annual Copper Mountain Conference on Iterative Methods
is scheduled from March 24-29, 2002. As in previous even-numbered years,
a Special Issue of J. Scientific Computing (SISC) is planned. We seek those
interested in submitting papers, with a deadline of May 1, 2002, for submissions
to this special issue.

This single issue will be dedicated to recent progress in iterative methods.

Those unable to attend the conference are strongly urged to submit papers,
as well. All interested should either submit electronically or send five copies
to the SIAM office, following SIAM's standard submission procedures. (See
http://www.siam.org/esubs/esisc.htm for further details on electronic submis-
sion and http://www.siam.org/journals/instruct.htm for further details on hard
copy submission.)

Whether electronic or hard copy, the author MUST clearly indicate in either
the electronic submission form or in the cover letter that the paper is being
submitted to the SISC Copper Mountain Special Issue. Papers submitted after
the May 1 deadline may not be considered for the special issue, at the discretion
of the SI Editor-in-Chief, Henk van der Vorst.
